DETAILED ACTION

1. This application is in condition for allowance except for the following formal matters:

a) New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because submitted drawings do not comprise any part numbers. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application.

b) The disclosure is objected to because of the following informalities: There are no any part numbers either in the description or in the drawings. At least parts/components claimed in the claims should be indicated by numbers in the drawings and mentioned in the description.

Appropriate correction is required.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.

Allowable Subject Matter

2. Claims 1-4 are allowable over the prior art.

3. The following is a statement of reasons for the indication of allowable subject matter: The claims are allowable over the prior art of record for at least the reason that

the prior art fails to teach or suggest a heat sink system comprising a circuit board, a heat generating electronic component mounted on the circuit board, a thermally conductive spacer having one end connected to said component at the bottom of said circuit board and another end to a thermally conductive substrate base having two opening, wherein a first opening containing at least partially a fan driving means, said fan drawing air through the first opening and blowing air out through a second opening, and a plurality of fins vertically projected from a bottom surface of said substrate base.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: Kajiura et al (US Patent 6,230,776); Sugishima et al (US Patent 5,497,289); Katooka et al (US Patent 5,831,240); Pande et al (US Patent 6,640,084) and Roberts et al (US Patent 6,639,360).
